- Experienced Project Manager and Software Developer adept in bringing forth expertise in Design, Installation, Testing and maintenance of Software Systems.
- Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.
- Experienced with the latest cutting-edge development tools and procedures.

Proficient in various platforms and languages such as **Big Data, MERN, MEVN, MEAN Full stack, PHP (Laravel, CI), Android (Java), iOS (Swift, Objective-C), Java (JSP, J2EE, Spring), Django/Flask(Python), C# and Ruby on Rails.**

- Excellent experience in several Databases such as **MongoDB, MySql, MSSQL, PostgreSQL** and **MariaDB.**
- Experience in designing web/enterprise applications using Software Development lifecycle (SDLC) methodology.
- Good understanding of backend model, client server and Multi-tier architectures.
- Excellent experience in Object Oriented Analysis and Design (OOAD), Development, Implementation and Testing of various Software applications using JavaScript and PHP platforms.
- Hands on expertise in Designing, Developing and Deploying applications using J2EE technologies including JSP, Servlets, Spring, Hibernate, EJB, JSTL, Struts, AJAX, JDBC, JNDI, Java Beans, Web Services and RDBMS.
- Strong experience with **MongoDB development** (reports, schema design, map reduce functions) and migrations from SQL relational databases.
- Excellent experience with major relational databases – **Oracle 8i/9i/10g, SQL Server, DB2 and MySQL.**
- Designing and Developing **Single Page Web Applications (SPA)** using **AngularJS** and **NodeJS** with other UI technologies/ libs such as **Backbone, JQuery, Bootstrap.**
- I am a senior blockchain developer with 7+ years of extensive experience with creating new Blockchain platforms and solving technical issues.

Hello I am Mamoon URasheed,And from Pakistan.

I am a fully skilled blockchain developer .

I am doing NFTs ICO DeFi and smart contract ,writing smart contracts, creating cryptocurrencies.

I am expert with Tokenomics and create DEX and CEX and so on.

With Binance Chain and Binance Smart Chain I have developed several Defi and Dapps and written smart contracts and deployed it in Binance Smart Chain and Binance Blockchain.

I have rich experience in Uniswap, Sushiswap, Swapping tokens, Staking, Yield Farming, Lottery Smart Contracts etc

I am also expert in all cryptocurrency exchange APIs (BitMEX, Bittrex, Binance, Bitfinex, Kraken, Poloniex, Gdax etc.). I have also worked with multiple Forex broker APIs.

My skills and experience include:

- ✔ Blockchain
- ✔ Binance Smart Chain
- ✔ Ethereum
- ✔ DEX
- ✔ CEX
- ✔ Fantom
- ✔ Polygon (Matic) Crypto Payment Gateways
- ✔ Tokenization
- ✔ Defi
- ✔ Smart Contract Development & Audit
- ✔ Cryptocurrency | Wallets.
- ✔ Writing smart contracts for large scale blockchain solutions.
- ✔ Fixing smart contract issues and auditing smart contracts.

TechSkills:

- ✓ Reactjs
- ✓ Nodejs
- ✓ Nextjs
- ✓ Typescript
- ✓ MongoDB
- ✓ Express.js
- ✓ Solidity
- ✓ IPFS

I like BITCOIN, especially I like its icon... - _^

So, This site serves for public and private school site and super admin..

In here, user permission is very important point...

I can suggest you RBAC model for user permission management, this model is good model for user permissions and I have worked with them for a long time, so I am very familiar with that..

And You said React + Node + NoSQL is good for this system, of course this is good..

But You'd like to use SQL for user permission and NoSQL for other data..

And any Frontend and Backend are good for this system, but however it will be good to use more modern frameworks..

Please contact me..

I hope work with you and I can finish it perfectly..

And I can work for you 40+hour/week..

And then, I have built a lot of educational management system of universities and schools, and in them, I have used RBAC model for user permission..

Actually I have used extended-RBAC model for them, and this solves security problems perfectly..

Thank you

Hello, My name is hajdu albert from hungary
I live in budapest

I have graduated from Himeji Dokkyo University and have done my Bachelor of Computer Science.
After graduation, I have worked as a full-stack developer for a long time,...about 7 ~ 8 years..
At that time, I have worked as a project manager and system administrator..

As a Senior Front-end developer, I have more than 7+ years of experience in Front-end development using React.js and Next.js(plus Vue.js, Nuxt.js) and have done many projects written by Javascript and styling with CSS and Bootstrap.

I have worked with so many projects with React.js and also familiar with RESTful APIs and also using Redux, Hook, Router, Context API and GraphQL.

I have expert level of Javascript(ES5&ES6), HTML, CSS, TailwindCSS and Typescript.

My strength is self-confidence, positive attitude and hard-working.
And also love clean and best-quality results with high-security protection.

My greatest weakness is that I sometimes focus too much on the details of a project. In some cases, it can be a strength but otherwise, it maybe a critical issue for project deadline. I've been striving to improve in this area by checking in with myself at regular intervals and giving myself a chance to refocusing on the bigger picture. That way I can still ensure quality without getting so caught up in the details that it affects my productivity or the team's ability to meet the deadline.

Why are you applying for this job?

I have applied for this vacancy because it is an excellent match for my skills and experience. This role is exactly the sort of role I am currently targeting, and I am confident I will be able to make a major contribution.

Why should we hire you?

"I have a good experience in that particular field (field of your specialization), and I think my talents will be a big contribution to your company."

How would you rate yourself on a scale of 1 to 10?

I will rate myself 8 out of 10 because I would never like to think that there should be a room left for putting in more efforts. That thought will create an interest in learning the things. Thank you very much for giving me this wonderful opportunity.

I am interested in running, walking and vps

Hello, Nice to meet you..

I am full stack web and blockchain engineer with rich experiences.

I have experienced 7 years more in only blockchain world and I have built a lot of project in this times...

I am major in NFTs, DeFi, DEX, Crypto Token, DAO and trading bot development and I have a lot of project I feel proud..

I have good knowledge about blockchain and web applications and good knowledge and experiences about microservice architecture...

I am very familiar with React, Node, Redux, Next.js, Typescript, Javascript, Nest.js, Express, Solidity and Web3, Ethers.js and MySQL, MSSQL. PostgreSQL and MongoDB and Firebase...

I am good at developing frontend, backend, smart contract and integration of them..

Please contact me and have an interview for this position..

Best Regards..

I WILL DEVELOP NFT GAME, BLOCKCHAIN GAME, CRYPTO GAME, NFT MARKETPLACE

Are you in search of developers to make an open world game, nft crypto game, blockchain game, racing game, or other type of game?

We are a team of developers who specialized in blockchain games, nft games, racing games, Poke Card, Poker, Board games, Crypto games, Multiplayer games, lottery games and unity game. Any type of Game you want.

WE ARE SKILLED IN

- NFT game design/development
- Implementation of gameplay mechanics, AI, pathfinding, inventory, quests, dialogs, animations
- Multiplayer (Photon network), client-server communication, login, database
- Game center and social integration, Ads, In-App Purchases
- Ability to review and understand an existing codebase.
- Experience working in an agile, team environment.
- VR, AR development
- Blockchain Consulting
- Cryptocurrency wallet development

If you require any of the services, please do not hesitate to contact us.

- Game Type
- 3D
- Game Engine
- Unreal Engine
- Platform Type
- PC
- Mobile
- Smart Watch
- Genre
- Action
- Adventure
- Arcade
- Fighting
- Role Playing
- Shooter

KINDLY CONTACT ME NOW!!!

We are having 10+ years experience with proficiency in NFT Marketplace | Smart Contract Development | Blockchain Development | ICO | Cryptocurrency | Smart Contract Audits | Public & Private Blockchain | dApps.

We evaluate, develop and maintain blockchain and Cryptocurrency related products.

Our Expertise :

- NFT (Non Fungible Token) Marketplace Development
- Crypto Coins Exchange Development
- ICO & IDO Development with Created Token (Coin)
- Smart-Contracts (Solidity, Truffle framework)
- Smart Contracts Audits
- Token development based on Ethereum and Binance (ERC20, ERC721, ERC 1155, BEP20, BEP721, BEP1155)
- DLT Apps & Private Blockchain Development
- Cryptocurrency Wallet Development for Linux, windows, Mac, Web.

My goal is to keep my clients on the leading edge of information transfer technologies, adding significant value to their business.

"You think IT. I build IT !"

Thank you for spending your valuable time on my profile.

I am a specialist on web developing ground and got a profound knowledge of doing anything related to this platform. Also, I have got an impressive urgency of learning and gaining new skills and knowledge with total ease. I am skillful at programming and coding languages and other skills given below:

1. Cryptocurrencies, NFT marketplace, Defi games, Swap, Farms and Staking, Tradingview chart in bitcion, ethereum, polygon, Fantom, etc.
2. Solidity, C/C++, JavaScript(Vue, React, ...), Python, Php, QT, etc.
3. Laravel, Wordpress, Codeigniter, CakePHP, etc.

Project Management: Trello, Asana, Jira
Version Control: Git(github, gitlab, bitbucket)
CI/CD: Jenkins, CircleCI,
Hosting: AWS, Godaddy

Understanding the preference of the clients

1. work best to uplift the position of the company
2. Arranging meeting and help out doing analysis of data

I have honored by bachelor's degree on Software Engineering. My previous clients have rated me with highest rank and recommended me with the highly positive reviews.

1. Meet deadline, hire rate >=31%
2. Entrusted with big companies like (write down the name of the companies)
3. Give the level best at any job without hesitation.

Thank you for the visit to my profile.

["http://3.80.219.222:80"](http://3.80.219.222:80)

From <<https://192.168.91.51/#-622540307>>

I am a Full Stack Developer with 7+ years of experience.(Java, React, Vue, Angular, PHP, HTML, CSS, WordPress, Node, Python, C++, C#, Firebase, Website Design, React Native, Flutter, Mobile app, WebRTC, Kibana, Ionic, Hybrid apps)

Also I'm a Full-Stack Blockchain Software Engineer & Blockchain Consultant specialised in creating secure and optimised smart contracts using Solidity for EVM (Ethereum Virtual Machine) compatible blockchains.

And I possess advanced frontend and backend developer skills, so I'm able to create smart contracts and connect them with web browsers to provide clean and easy-to-use web interfaces using tools like React, Redux, Web3.js, Ethers.js, TypeScript, Next.js, etc.

I am available to work full-time and to change my time zone to reach client goals. As well as this, I will maintain client trust.
It is not easy to maintain trust with clients to everyone, but I will try my best to maintain the relationship.

Hi, Thanks for visiting here!
I've been working as a Web Developer for a long time. And, this is what i like to do 24/7!

I've many skills which includes these -

1. HTML/HTML5
2. CSS/CSS3 - Bootstrap, Material Design UI, Foundation, SASS, LESS, TailWind CSS etc.
3. JavaScript - jQuery, jQuery UI, jQuery Mobile, Node, Next, React, typescript
4. PHP - Wordpress, Laravel, CodeIgniter
5. JAVA - Spring Framework, Hibernate, Struts
6. Database - MySQL
7. Mobile - Cordova, PhoneGap, Framework 7
8. Desktop - ElectronJS
9. Game - Construct 3

--- Just give me a chance to work with you. Trust me, if you hire me once, you will hire me again and again! ;)

If you have time, read some feedback.

Thank you.

My goal is to keep my clients on the leading edge of information transfer technologies, adding significant value to their business.

"You think IT. I build IT !"

Thank you for spending your valuable time on my profile.

Hi Josh, I am Maksym from Ukraine and I am having great interest with your project.
<https://xvield-labs.com/>

I mainly focus on XRPL and develop XRPL related projects.
I just want to get a remote job on your side and get paid if possible or just keep in touch.

<https://xrpl.to>

This is my project and can make the similar website if you want.

I have the following skills;

Web Development(Frontend & Backend):

- ◆ JavaScript, TypeScript, HTML5, CSS
- ◆ React.js, Next.js, Vue.js, Nuxt.js
- ◆ PHP, Laravel, Think PHP, CI
- ◆ Redis, SQL, MySQL, MongoDB, Firebase, PostgreSQL
- ◆ Express, RESTful API, Twilio API, Google API, Quote API, Binance API

Blockchain

- ◆ Hyper Ledger, Sidechains
- ◆ XRPL, XLS-14D, XLS-20D
- ◆ Forking Blockchain network, Protocols
- ◆ Smart Contract, DeFi, DApps, XRPL applications
- ◆ Smart Contract (ERC20 + ERC721) and Audit
- ◆ NFT marketplace on several chains.
- ◆ NFTs (ERC-721, ERC-1155, Flow, BSC, Solana, Polygon, OpenSea, Nifty, etc)

Linux (Embedded)

- ◆ Linux applications
- ◆ Kernel Drivers
- ◆ Embedded linux applications

If you are interested, let me know.

Hello how are you

I am fullstack and smart contract developer with more than 6 years of experience

I am looking for a new job now

My main skills;

- Smart contract development using Solidity and Rust (3 years)
- NFT metaverse game development
- Forking various defi platforms including Uniswap and Pancakeswap
- Sniper / Arbitrage / Front Running Bot
- NFT marketplace, Dex platform
- Integrating frontend with web3 (3 years)
- Tokenomics(ICO/IDO/Airdrop)
- Web development (6+ years)
- React.js, Vue.js, Angular (5+ years)
- Node.js, PHP (4 years)
- python AI

My experience;

- DEX and NFT marketplace development
- Smart contract development and deploy on Ethereum mainnet
- Blockchain(NFT) game development
- Website development (frontend and backend)

So we can discuss more detail in the chat about your project.

Always I write the clean code so that anyone can check and understand my codes easily, so no worries about that. As well as, I can make the deadline task by task as your requirement.

Thank you for your time and kindness

Best Regard

From <<https://192.168.91.51/#-1537946888>>

- ◆ Linux applications
- ◆ Kernel Drivers
- ◆ Embedded linux applications

If you are interested, let me know.

Best,
Maksym

about that. As well as, I can make the deadline task by task as your requirement.
Thank you for your time and kindness
Best Regard

From <<https://192.168.91.51/#-1537946888>>

Hello, how are you
I am looking for a job
I have rich experience in building Defi/Web3 App platforms such as protocol launching, Staking/farming, NFT marketplace/minting, cross chain and so on
if you contact me, you will get the best project you want in the short time with paying the lowest price
I am not associated with any company and I work individually without outsourcing your work.
And I can have flexible communication with you and I can respond at any time when you contact me.
I can start work immediately and also I can work full time in your time zone.
I'd really appreciated if you give me a chance to work with you for long term
I'm confident in these fields below:
✓ Protocol Launching, Bitcoin flash
✓ 2nd Layer blockchain, private/skybird blockchain
✓ Smart Contract, DeFi, in Ethereum, Solana, Avax, Wax, Algorand, Polygon, BSC, Polkadot
✓ NFT Royalty
✓ DApps development ; Solidity/Rust + web3.js/ethers.js
✓ Solidity, Rust, Golang, C++, Java, Python
✓ Integration with crypto wallets such as Metamask.
✓ SQL and NoSQL (MySQL, MSSQL, PostgreSQL, InfluxDB, MongoDB), Redis
✓ Systems Administration (DevOps, Docker, Apache, Nginx, Heroku)
Please contact me if you want reliable developer.
Best Regards

From <<https://192.168.91.51/#-1537946888>>

Thursday, May 5, 2022 3:24 AM

NFTDEV

Hello Did you have some idea where you store whitelist? Backend or Smart Contract?

If you have no idea, I suggest Backend,, I have already built P2E games and so I am very familiar to paying tokens.

I am specialized in NFT. I am experienced in NFT minting, staking, voting sites and market place and rarity tools

I can help you in your other ongoing project a lot

looking forward to your contact

thanks

I have built NFT minting site on MultiVAC chain and Ethereum

<https://mtvpunks.com>

is based on MultiVAC chain.

This is my last project and I have developed both of Smart contract and frontend, backend for this.

This includes voting functionality and integrating wallet using web3.

I have use React and solidity, Node

in here, I have whitelist in Backend

And other my previous projects are:

<https://nft-mint.org/>

<https://roguerabbitsrabble.com/>

...

and P2E game I have built is :

<https://trollgame.io>

As I am full stack developer, I am very familiar arising frameworks, like React, Node, Next, TypeScript, Tailwind Css and so on

Hello Winston

I have just finished NFT marketplace recently using React, Redux, Solidity, Web3..

I have built a lot of NFT minting and voting, staking sites and NFT marketplaces and rarity tools on MultiVAC chain and Ethereum..

I am very familiar with various arising frameworks such as React, Node, Next, Typescript..

Developing Smart Contract is very important for NFT minting site or marketplaces..

It is my major skills

I am a full stack blockchain developer, specialized in NFT..

I have deep knowledge and rich experiences, high skills

I can finish this project perfectly for a short time

Contact me and share your details

Thank you, Best Regards

Hello

I am a full stack blockchain developer with high skills and rich experiences and deep knowledge..

I am very familiar with NFT minting and marketplace and DeFi and DAO..

I have created a lot of blockchain project, such as <https://mtvpunks.com>, <https://cyop.io>, <https://nefti.art>, <https://nft.cyop.io> and so on..

Please contact me and share your more detail..

Thank you!!

Hello, I am full stack web and blockchain developer with rich experiences and high skills..

And I am specialized in NFT and recently I am working with NFTs..

Here are some NFT project I have built in only this year..

<https://nft.cyop.io> - NFT minting

<https://cyop.io> - token DAO

<http://nefti.art> - NFT marketplace

<https://mtvpunks.com> - NFT minting and NFT DAO

and I have more past works I have built and it is on deploying...

I am very familiar with all of Frontend, Backend, Smart Contract and web3 integrations..

Contact me and let's start immediately..

Best Regards

Hello I have just finished NFT marketplace on MultiVAC chain using React, Node, Web3 and solidity.

The important things to build marketplace are flexibility about various types of NFTs

I have deep understanding about marketplace and because I have just finished it, I am very familiar to this

I am blockchain expert and I am specialized in NFT.

I have experienced in NFT marketplace, minting, voting, staking and rarity tools and P2E games

I have taken part in developing all types of these and I have ever developed all of smart contract, frontend, and backend..

As I am full stack developer, I am very familiar to various rising frameworks, such as React, Node, TypeScript, Next, Vue.js, Web3.js and Solidity, Solana.

I can discuss with you what framework we will use..

contact me for good result

thanks a lot

Hello

I have read your post. I have built NFT marketplace just now.

As I am a full stack developer, I have developed smart contract and frontend in this project..

of course this project doesn't include backend...

I have used React, Redux, Web3, Solidity, Firebase for this project.

I have implemented auction, fixed sale, import collections, integrating Metamask, interaction between smart contract and frontend and asynchronous functionalities

check me more via interviewing

contact me please

thanks

Hello

I have just created a new TOKEN, called AFC(Africeum Token) and have just built NFT minting and marketplace using the TOKEN for payment recently..

It is called Africeum NFT and Next monday will be deployed...

I am a full stack blockchain developer and specialized in NFT..

I have deep knowledge and high skill and rich experiences in Blockchain, especially NFT and DeFi..

I can provide good information and trend in NFT field and Crypto...

I have worked alone, so I had to build all of backend, frontend, Smart Contract and integrations..

In latest project- Africeum Marketplace, I have used Express, Node for backend, TypeScript, Redux, TailWind CSS for Frontend, Solidity for Smart Contract, and Web3, Ethers.js for Integration, and Firebase for DB..

I am also familiar with other arising frameworks such as React, Node, Next, Vue and so on.

Please contact me and share your details...

Hello, I am an NFT expert and Token expert..

I have created many Tokens and NFT sites..

So I am very familiar with payment and NFT, Token..

Contact me please and share your detail..

Thank you!

So easy project!!

Forking is very easy, I think..

Recently I have forked Opensea - NFT marketplace and Pancake swap - DeFi..

They are named as Africeum NFT and InveSwap..

I am very familiar with Next.js, React, Node, TypeScript, Redux, Web3 and Solidity and so on..

Please Contact me ..

Thank you!

opensea forking is not deployed.. but I have share on my VPS.
<https://app.investoland.io>
<https://nefti.art>
<https://mtvpunks.com>
and so on

Hello, I am full stack web and blockchain developer and I am very specialized in NFT..
I am very familiar with NFT minting, staking sites and NFT marketplace and NFT Rarity tools..
I have built many NFT marketplaces based on various chains..
Recently I have forked OpenSea and I have built all of Frontend, Backend and Smart Contract and Web3 integration..
I am very familiar with various frameworks such as React/Redux, Node, Express, Typescript, Next, Nuxt, Express, Nest, Web3, Ethers.js and solidity..
I have implemented all functionalities for marketplace such as Sell, Buy, Listing and Bid, Offers and so on..
Please Contact me and let me know more details..
Best Regards

Describe your recent experience with similar projects
I have built a lot of NFT marketplace.. I have built Smart Contract with Solidity and I have used Web3 and Ethers.js for web3 integration... And I have used Typescript, Next.js, React.js, Tailwind CSS for Frontend and I have used Express, Node for Backend and I have used Firebase and ...
more
Please list any certifications related to this project
I will share on interview..
What frameworks have you worked with?
I am fluent in various frameworks such as React, Node, Redux, Typescript, Next, Nest, Nuxt, Web3, Ethers.js, Tailwind CSS and solidity..

Hello,
I have just ended an NFT marketplace forked OpenSea and its name is Africeum NFT marketplace..
It is not deployed yet, but you can see it on <http://160.20.147.57>, and it will be deployed <http://www.africeumnft.com>.
This is fully forked OpenSea and lookrare is very familiar with me, because recently my one client asked me to develop an NFT marketplace similar to this..
I am full stack web and blockchain developer with rich experiences in NFTs, DeFi, DAO, Token Creation and bot development..
I have built 10+ NFT and DeFi projects in this year and most of them are NFT projects - NFT minting, staking sites and NFT marketplace and NFT DAO, and one of DeFi project..
In NFT marketplace, I have implemented all functionalities in OpenSea like lookrare, and DeFi is similar to Pancake Swap..
I am familiar with React, Redux, Node, Next, TypeScript, Tailwind CSS, Express, Nest.js, Web3.js, Ethers.js, Solidity, GraphQL and so on..
And I can finish this project in a short time, because this is very familiar with me..
Contact me and Let me know about your project...
Best Regards

Hello, I have built a lot of bots and I am major in various bots development on PancakeSwap and UniSwap..

I am a full stack web and blockchain developer with experiences and high skills..

I am major in NFT, DeFi, crypto token and trading bot development..

I have good understanding in DeFi and crypto world, so I have built effective trading bots..

Contact me and let's talk about your bots..

Best Regards
